PROJECTS

Cyberbullying Detection on Social Media Feb-2025

- **Cyberbullying Detection Using Machine Learning (Python, NLP, Scikit-learn, Social Media APIs)**

Developed a machine learning model to detect and classify cyberbullying content on social media platforms.

- Collected and preprocessed real-world datasets (e.g., Twitter, Facebook) using Natural Language Processing (NLP) techniques such as tokenization, stemming, and TF-IDF. Trained and evaluated multiple classifiers (e.g., Logistic Regression, SVM, Random Forest) to identify abusive, racist, and threatening language with an accuracy of **X%**.

Bank Management System - Python, SQL July-2025

- Developed a Bank Management System with user authentication (Account No & PIN) and role-based Admin module.
- Implemented transaction management including debit, credit, balance updates, and account statement generation.
- Ensured data validation, transaction logging, and SQL integration for system reliability and security.

CERTIFICATIONS AND ACHIEVEMENTS

- **Python Full Stack Developer** – Certified by [EduSkills](#) 
- **Cloud Computing** – Credentialed by [NPTEL](#) 
- **Frontend Developer** – Certified by CodSoft IT Solutions
